

Microsoft has selected craft ai to join its AI Factory founding members

With the goal of promoting the emergence of Artificial Intelligence champions, Microsoft has chosen craft ai to join its AI Factory and develop an AI ecosystem from Station F, the biggest startup campus in the world!

Paris, France, September 22. Created by Microsoft in partnership with INRIA, the leading French research Institute for computer science and applied mathematics, the AI Factory is taking up residence in Station F. Microsoft took this opportunity to unveil its selection of 7 startups already recognized players in the AI market, and give them the mission to grow the community.

"We are very proud to welcome these startups that contribute to the development of Artificial Intelligence technologies [...] By accompanying these mature startups, we want to stimulate the creation of an AI community within Station F, thus accelerating the deployment of a true French ecosystem of artificial Intelligence bringing innovation beyond Borders." explains Christopher Shaw - Director of Commercial Software Engineering @ Microsoft France.

Alongside 6 other startups, craft ai will contribute to the emergence of this ecosystem by sharing its explainable AI expertise and, on the other hand, what it

has learned implementing hyper-personalization and cognitive automation use cases.

"We are delighted that Microsoft selected us to join their AI Factory! We are looking forward to contribute to the development of a leading Artificial Intelligence ecosystem. craft ai is on a mission to build the best explainable AI API to improve every customer and employee experience. Microsoft BtoB expertise and INRIA scientific support will enable us to boost our deployment" - says Stéphane Delorme - CEO @craft ai.

**** Startups selected by Microsoft to join the AI factory are:**
